

EXgarde 4.5

Access Management Software.

EXgarde 4.5 is a fully featured Access Management PC software application that combines an extremely intuitive graphical user interface and powerful integration capabilities in a single package. Supporting multiple doors as standard with the option to extend this with an unlimited door licence, EXgarde meets the needs of even the largest of access control networks. With EXgarde 4.5, integration and expansion are key features and there are numerous possibilities to integrate with the latest CCTV and biometric technologies.

Key Features

- **Intuitive graphical user interface**
Straightforward operation minimising training requirements.
- **In-built Wizards for common tasks**
Guides the operator through key operations making use of the software simple.
- **Compatible with 32-bit/64-bit Microsoft Windows®**
Support for the latest versions of Microsoft operating systems.
- **Fully configurable automated database backup facility**
Provides peace of mind should things go wrong.
- **Numerous communication methods including TCP/IP, dial-up and GSM modems**
High degree of versatility allowing connection wide national and international installations.
- **Detailed context sensitive help system**
Assists the operator at the point that help is required.
- **Automatic fire door release function**
Allows the automatic unlocking of fire doors in the event of a fire¹.
- **Custom site graphics with animated icons for instant visibility of information**
Allows simple operation of the system from a purely graphical interface².
- **Advanced prioritised alarm handling for optimum operator response time**
Alarm conditions are brought immediately to the attention of the operator².
- **Personnel image capture and Photo ID badge design and print with video verification**
No need to purchase a photo ID badging module. Everything is included as standard².
- **Integration capability with leading manufacturers of DVR equipment and biometric readers. TDSi DIGIgarde integration included as standard³**
Provides a means of accessing and controlling third party equipment through EXgarde PRO without the need to run additional applications.
- **IP camera connectivity³**
Standard feature allowing the display of live video feeds from any netcam camera.
- **Integration to third-party ODBC databases using SDK or predefined protocol, building management, fire and intruder systems³**
A means of seamlessly transferring and populating cardholder data and events between systems.
