

guard tour

Guard Tour

EXgarde PRO's Guard Tour Module provides you with the ability to pre-define specific security tours utilising the existing access control readers. Each tour defines the order the readers should be visited, along with a set time that they should be checked. Real time alarms indicate if a specific tour point has not been reached in case of an emergency.

FEATURES AND BENEFITS

Utilise existing readers

No need to add extra hardware around your site.

Easy to configure

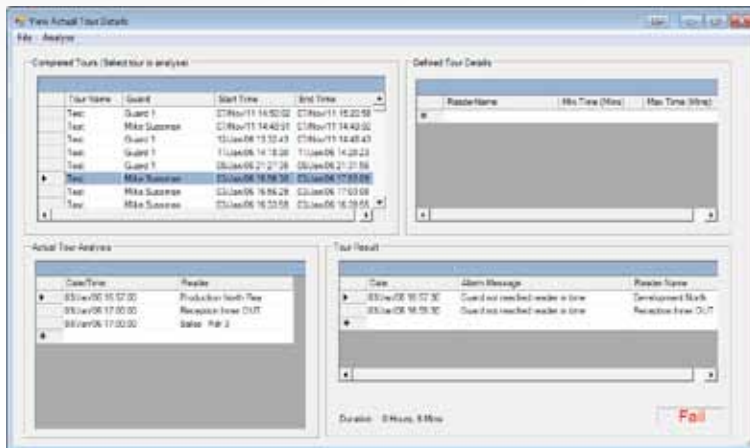

Add multiple tours and guards and initiate any tour to any guard to provide variability for increased alertness.

Real time alerts

Monitor progress of tours and obtain instant notification of any anomaly, such as guard down.

Analyse completed tours

Provides detail on actual tour times and alarms for planning and reporting purposes.

ORDERING INFORMATION

Part Number: Part Number 4420-2400

Description: Guard Tour module
