

Milestone ACM

The EXgarde Milestone ACM plugin has been developed to allow EXgarde installations to integrate in to Milestone. The plug-in will allow users to use Milestone as their primary user interface whilst having access control via their EXgarde software.

'Determined to unite access control and video into one powerful security solution, Milestone introduces XProtect® Access Control Module, an add-on product to the XProtect VMS product suite. XProtect ACM provides XProtect® Smart Client users with an easy-to-use interface to operate one or more access control systems. Dedicated functions in the XProtect Smart Client enable users to effectively monitor events, manually control passage and conduct access event investigations from the outset.' - Milestone

Milestone ACM

DS00XX_Issue 1

FEATURES & BENEFITS

View live events

- View live video from the cameras associated with the access points in the access monitor
- Displays access control events with corresponding video
- Track access control events live
- Apply filters for selection or relevant access points
- View state of access points and video from associated cameras

View Keyholder information

- Displays cardholder information from the access control system

Full door Control

- View current door status for example, door open/closed/locked/unlocked or server connected/disconnected
- Perform certain door commands like lock or unlock

Use of maps

- Track access control events live
- Apply filters for selection or relevant access points
- View state of access points and video from associated cameras
- Control units, such as lock and unlock single doors

Alarm handling

- Access control events can trigger alarms in the integrated alarm management function
- Including:
 - Alarm list
 - Alarm handling instructions
 - Instant access to related video

Access request fly-out

- Fly-out triggered by events such as input events (doorbell) or access-denied events
- The notification includes:
 - Live video from associated camera
 - Cardholder information
 - Two-way audio communication (if available)
- Support for executing commands such as unlock doors

Investigating incidents

- Investigate individual access control events with instant playback of associated video
- A shortcut makes it possible to get a listing of the specific cardholders events in the Access Control tab

ORDERING INFORMATION

Part Number: 4420-2211

Description: Milestone ACM Integration Module

SYSTEM REQUIREMENTS

- EXgarde 4.5 installed with a valid license.
- Milestone ACM feature enabled in EXgarde License Server – this can be done via the upgrade button in the license application
- EXgarde Web V2.0 enabled in License sever and fully installed as per document UM0082 found in the Documents folder in the EXgarde Installation directory.
- Milestone XProtect installed and licensed.
- Microsoft .Net 4.5.1 installed
