

Technical Bulletin - TB0026

TCP/IP Module Upgrade for TDSi's MICROgarde Controllers

TDSi is constantly looking for ways to improve our products. This upgrade to our TCP/IP module will improve the set up and installation of TDSi TCP/IP based access control MICROgarde controllers.

- The old PCB was fixed to the chassis with a Self Tapping Screw.
- The new PCB is fixed in the same manor, but requires a Plastic Washer between the PCB and the Chassis.
- The Self Tapping Screw and Plastic Washer is supplied with the Kit.

Further Information:

If you require further information about the TCP/IP module upgrade for MICROgarde, please contact our support team on:
