# Hikvision ANPR Camera Integration

# GARDiS Software Hikvision ANPR Camera Integration

TDSi's GARDiS Software integrates with Hikvision's DS-2CD4A26FWD-IZWG/P ANPR Camera to identify a Key Holder's Car Number Plate information as Access Control Credentials which are in turn passed to an ACU to authorise access.

Developed in collaboration with Hikvision, GARDiS ANPR Camera Integration uses Hikvision's DS-2CD4A26FWD-IZWG/P ultra-low light smart camera to capture vehicle and recognise vehicle number plate of various countries and regions in dim light environments.

GARDiS Pro Software is used to associate Car Registration details with a Key Holder and once set up the camera acts as a WIEGAND Reader to identify Number Plates and pass information back to an ACU.

## At a Glance

- Use Car Number Plate information as Access Credentials
- Works alongside other keyholder credentials and access levels
- Numberplate ID's are used in the same way as standard credentials
- Full reporting on activity and usage
- Easy to configure with GARDiS Pro Software
- Full control over adding, updating and deleting permissions

## Hikvision

**Hikvision provides a broad range of physical security products, covering video security, access control, and alarm systems. They also provide integrated security solutions powered by AI technology to support end-users with new applications and possibilities for safety management and business intelligence.**
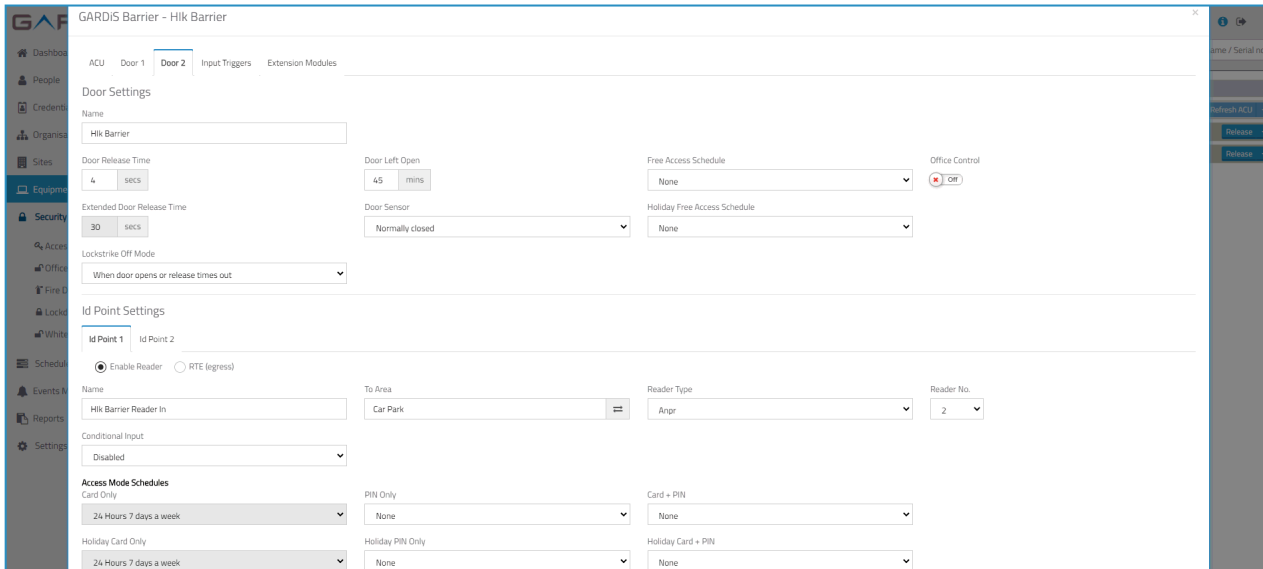

Hikvision has established one of the most extensive marketing networks in the industry, comprising 66 subsidiaries and branch offices globally, to ensure quick responses to the needs of customers, users and partners. Hikvision products serve a diverse set of vertical markets covering more than 150 countries.

Hikvision went public in May, 2010, and is listed on SMEs Board at Shenzhen Stock Exchange.

## About TDSi
