GARDiS Software CALMS Integration

CALMS' Visitor Management Software Platform integrates with GARDiS Pro Access Control Software to deliver an intuitive visitor management solution designed to provide a seamless access control solution for visitors and others with temporary access to any GARDiS Pro controlled site.

The CALMS Platform can be customised to create bespoke visitor check-in processes to enable the collection of additional visitor-specific information depending on the nature of the temporary pass issued. For example, temporary contractors may have to share proof of qualification or insurance before their pass is issued whereas for other visitors it may be a requirement that they provide their Passport Number or Drivers License.

The Software allows for easy issuance of a visitor pass or credential, along with additional bespoke access control rights associated with the pass. This enables granular customisation of parameters such as access levels and credential validity periods which are then passed to GARDiS Pro upon visitor pass issuance.

At a Glance

- Quick and easy Visitor Registration
- Custom workflows to facilitate gated visitor pass creation
- Visitor Check-in and Check-out
- Notification of visitor arrival to hosts or employees who may be expecting them
- Capability to maintain digital records of visitors.
- Multi-site support allowing for visitor passes to be used over multiple sites if needed

Please Note: This GARDiS Software Integration also requires a subscription to CALMS' Visitor Management Software Platform which is available from CALMS directly. Visit **calms.com.my** for more infomation about the CALMS Platform.

CALMS

Established in 2002, CALMS Technologies Sdn. Bhd. is a Malaysian incorporated company that provides cost effective and leading edge smart id solutions.
