Milestone XProtect Integration

Milestone's XProtect Platform integrates with TDSi's GARDiS Software via Orbnets middleware solution. This allows XProtect to receive information from a connected GARDiS Access Control Unit via TDSi's GARDiS REST API subject to the correct GARDiS Milestone Integration License, Orbnets License and Milestone XProtect Software.

Made in collaboration with Orbnets, the GARDiS integration for Milestone XProtect allows connection and management of GARDiS within Milestone XProtect Access to give a streamlined video management system complete with security processes and management of users and visitor events. Linking GARDiS to the Milestone system harnesses the power of Access Control data for your Video Management System allowing users to save time investigating incidents. XProtect Access allows you to connect a GARDiS Access Control system directly to Milestone's XProtect VMS. It is designed to fit perfectly with any XProtect product. No matter your installation size, with XProtect access you can control your video cameras and access your control system from a central interface. Trigger Milestone rules with GARDiS events to allow a proactive response to alerts.

At a Glance

- Associate Cameras with doors as they are viewed in the Smart Client - Live and Playback
- Access Monitor in the Milestone Smart Client shows cardholder events in real-time
- Interactive icons on the Milestone Map – Release, Set Barred, Set Unlocked and Controlled Access
- Acknowledge alarms from Milestone and clear in both systems
- Search events/doors and cardholders in the Access Control tab
- Acknowledge and close alarms in GARDiS from the Milestone Smart Client
- Extensive list of Access Control Events can be used in both Alarms and Rules

Please Note: This Milestone Integration with the GARDiS Access Control Software Platform also requires a subscription to the Milestone XProtect Software Platform which is available from Milestone directly. For full integration functionality, please see Orbnets GARDiS Integration Manual. Primary product support for the Milestone XProtect Platform and the Orbnets Middleware Connection are provided by Milestone and Orbnets respectively.

Orbnets

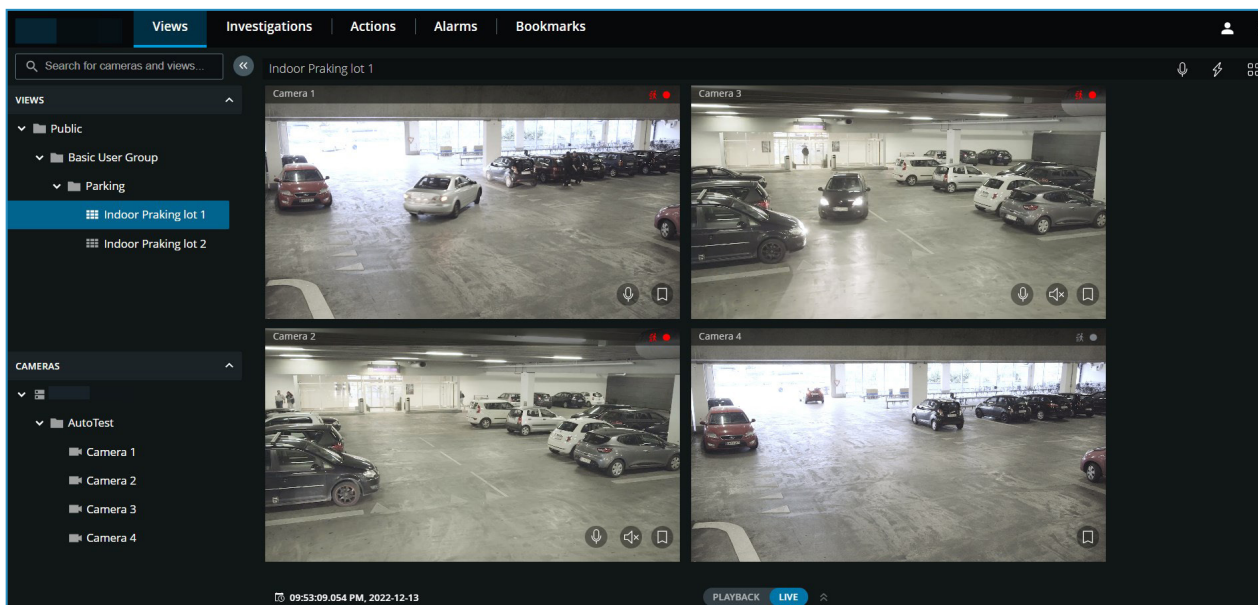

ORBNET SYSTEMS are a UK based security system software company focused on video surveillance and custom software development, they specialise in video streaming protocols, radar technology, surveillance drones, alarm systems, access control and cloud integrations. They have many products available on the Milestone Marketplace and are well placed to help customers and end-users with the complexities of video surveillance.

Milestone

Established in 1998, Milestone Systems video management software enables organizations and institutions to create the perfect combination of cameras, sensors and analytics. XProtect video management software (VMS) connects your cameras, sensors, analytics, and sites in one easy-to-manage interface. You can customize a more future-proof, resilient, and data-safe security environment that lets you see and do more.

About TDSi

Robust and reliable Access Control Systems manufactured by world-renowned security specialists TDSi for the last 40 years. Protecting and securing your building, assets, and people is a high priority for any business. However, those responsible for building security often find themselves overwhelmed by choice. TDSi is a specialist in access control, offering a range of superior products that not only answer the security challenges of the 21st century but delivers peace of mind to those who trust in our expertise and experience.
